Miguel Cordero Collar

IT Innovation Project Manager @ Red Bull

AI innovation · Agentic AI · Product delivery

Based in Salzburg, Austria · Originally from Asturias, Spain

miguelcorderocollar@gmail.com · LinkedIn · GitHub · miguelcorderocollar.com

PROFILE

IT Innovation Project Manager focused on **AI and agentic AI**, combining **hands-on development** with product management and enterprise delivery. I develop and lead proofs of concept and pilots at Red Bull, advise teams on emerging technology, and build agents, prototypes and internal tools for software development and business workflows.

AI EXPERTISE

- **Agents & applications.** Custom agents, skills and plugins; MCP development and tool integration; AI features in applications; enterprise agents in the Microsoft ecosystem; agent testing and output validation.
- **Adoption & enablement.** Use case assessment, prototyping, AI adoption consulting, workflow automation, internal training and knowledge sharing.
- **Research & experimentation.** AI market trends and technology research; innovation topics and practical experiments for coding and business use cases.

EXPERIENCE

IT Innovation Project Manager

Red Bull · Jan 2026 - Present · Salzburg, Austria

- **Develop and lead innovation proofs of concept and pilots** across the company, with a focus on AI and agentic AI.
- **Build AI prototypes and demos**, agents, API integrations and internal tools.
- **Advise internal teams** on emerging technology opportunities and how they apply to business workflows.
- **Research and shape innovation topics**, including AI use cases for software development and business teams.

IT Project/Product Manager

Red Bull · 2021 - Dec 2025 · Salzburg, Austria

- Led **product development for internal tools**, covering roadmap planning, feature definition, market and user research, product lifecycle and adoption.
- Managed a **custom development solution** for Marketing, Operations and Legal.
- Implemented and administered **Zendesk and Bynder** across multiple use cases, with a focus on workflows and business process optimisation.
- Coordinated **cross-functional teams and project activities** through delivery, alongside quality assurance, technical support and software development.
- Acted as the **department's AI expert** alongside product and SaaS responsibilities.

EARLIER EXPERIENCE

- **Enmacc · Web Developer Intern · 2020 - 2021 · Munich.** Website development, UX/UI and promotional design, and marketing automation.
- **Orbem · Business Analyst Intern · 2020 · Munich.** Internationalisation strategy, financial modelling and customer acquisition during a four-month university project.
- **Avanade · Software Developer Intern · 2019 · Madrid.** Front-end and back-end fintech development in Agile teams, using .NET C#, JavaScript, SQL and Angular.

SELECTED PROJECTS

Endless AI Quiz

AI learning app with adaptive questions and source-backed explanations. In development.

ExtractMD

Chrome extension that turns webpages, YouTube transcripts and Hacker News threads into Markdown.

Linux & open source

Omarchy plugins and upstream contributions, including AI wallpaper generation and mpv controls.

Bundle Icon Generator

Icon utility for searching, customising and exporting app icon bundles for different platforms.
